ELECTRIC START INVERTER GENERATOR

9000W/11.25kVA MAX. 8200W/10.25kVA RATED OUTPUT

SMART THROTTLE - Matches engine speed to power draw to ensure super quiet operation and fuel saving

POWERFUL 4 STROKE OHV POWERDYNE ENGINE - The latest in compact engine technology offers exceptional power-to-weight performance, efficiency and long term reliability

2 WIRE START - Set up with communication connections for ATS, for 'plug and play' compatibility for solar backup and integration.

ELECTRIC START - with recoil and remote options included

QUIET OPERATION - Equipped with noise cancelling oversize muffler for quiet and stress free running

LARGE 27L TANK - Allows for extended long run times and eliminates the hassle of refilling in inclement conditions

VARIETY OF POWER OPTIONS - 2x 15A, 1x 32A outlets and convenient USB charging

PERFECT POWER - Pure Sine Wave Inverter power for safe and efficient powering of sensitive electronics and appliances

HEAVY DUTY 32MM FRAME - With 2 Solid core wheels and chassis protection bar for rugged durability in all conditions

LOW OIL ALERT FUNCTIONS - For automatic preventative maintenance and durability of the generator

4 STAGE DIGITAL METER DISPLAY - For up-to-date feedback on status when in use

**...for safe powering of
sensitive electronics!**
